

YEAR 8 MASTERY SHEETS

#TheLongdendaleLegacy

Literary Movements and Genre | English |

Week 1		Week 2		Week 3	
Question	Answer	Question	Answer	Question	Answer
What is meant by authorial intent?	The impact or effect the writer wants to get across to readers.	What does it mean to analyse?	To look in depth at a text, to break it apart and to explain how different parts are effective.	What is meant by the supernatural?	An event or a force beyond what can be scientifically explained.
What was important to writers in the Romantic era?	Emotions, imagination and the beauty of nature.	What is a noun?	A naming word: the name of a person, place or thing.	Why did the supernatural appeal to Romantic writers?	They were fascinated by things they couldn't explain.
How did Industrialisation cause writers to embrace <i>Romanticism</i> ?	Rebellion against technology, which caused writers to turn to nature instead.	What is an <i>adjective</i> ?	A describing word: a word which describes a noun.	What are features of Gothic stories?	They are dark and eerie and create fear in readers.
What is meant by individualism?	Everyone has a unique perspective and voice and should trust their instincts.	What is a verb?	A doing word: an action.	What is a metaphor?	A figurative device which compares two things by saying one <i>i</i> s the other.
What is a simile?	A figurative device which compares two things using <i>like</i> or <i>as</i> .	What is an <i>adverb</i> ?	A describing word: a word which describes how a verb is done.	What is pathetic fallacy?	A figurative device where nature, often weather, mirrors the emotions of the text.
What is personification?	A figurative device where an inanimate object is given human qualities.	What is a pronoun?	A word which replaces a noun (he/she/it/they etc),	What is juxtaposition?	A structural device where two opposite or contrasting ideas are used together.

Week 4	NA/ I - E	Week 6
WAAK 4	Week 5	WAAKA
VVCCN T	Week 5	vveek o

Question	Answer		
When was the Victorian period?	The time of Queen Victoria's reign – from 1837-1901.		
What was important to writers in the Realist era?	Capturing real life in an honest way, even if that meant suffering or misery.		
Why did writers reject <i>Romanticism</i> in favour of <i>Realism</i> ?	They wanted their writing to be less like fantasy, and more honest.		
What was Dickens' authorial intention?	To share the plight of the poor and to fight for social reform.		
What does it mean to <i>advocate</i> for others?	To stick up for them or to argue on their behalf.		

Question	Answer
What is a rhetorical question?	A question used to make a point, rather than to actually get an answer.
What is an imperative command?	A sentence which gives an order or instruction to the reader.
What is emotive language?	Words, phrases or imagery which evokes a strong emotional reaction.
What is an inclusive pronoun?	A pronoun which includes both the writer and the reader: we / us / our.
What is an exclamatory sentence?	A sentence with an exclamation mark to denote passion or emotion .

Literary Movements and Genre | English |

Week 1		Week 2		Week 3	
Question	Answer	Question	Answer	Question	Answer
What is the premise of a story in the Science Fiction genre?	Fiction based on imagined future scientific or technological advances.	What was Stevenson (who wrote <i>Jekyll</i> and <i>Hyde</i>) warning readers about?	The dangers of science and of human nature.	What do we mean when we talk about 'devices' in English?	A technique a writer has used such as simile, metaphor or personification.
What is meant by social commentary?	When a writer's work comments on, judges or illustrates an issue in society.	Why was Imperialism commonly written about in the Victorian times?	Britain's powers were growing as we colonised around the world.	Whose reaction must you explore?	The reader's.
What were some common Victorian fears?	Scientific developments, human nature, the unknown, the consequences of class divides.	What was Wells (who wrote <i>War of the Worlds</i>) warning readers about?	The dangers of Imperialism and of colonisation.	What is tentative language?	Words/phrases which show you are not certain: possibly, might, could
Why did religious faith heighten fear of science in the Victorian times?	Science seemed to contradict some religious ideas.	How do you start a paragraph of analysis?	Make a point which answers the question.	What is word-level analysis?	Picking a key word in a quote and exploring its connotations.
What is meant by human nature?	What makes us human: the way people think, feel, and behave.	What do you use as evidence in your analysis?	One or two quotes from the text.	What do we mean by connotations?	Words/ideas/feelings that a word makes us think of.
What is meant by society?	A group of people who live together in a community with shared rules and values.	What does it mean to infer?	To work out what a writer is suggesting beyond just what they have said.	What do we mean by authorial intent?	The effect / message the writer inteded to put across.

WAAK 4	WAAK 5	WAAK b
VVCCK T	VVCCK D	VVECK U

Question	Answer
What is literary Modernism?	A literary movement where writers could be more imaginative and creative than before.
What is meant by stream of consciousness?	When writing mirrors the uncontrolled nature of human thought.
Why was there a lot of uncertainty in the Modernist era?	Because the world was changing so rapidly.
What do we mean by tone?	The mood or feeling of a text.
Why must you always develop your ideas in detail?	In order to be convincing or persuasive.

Question	Answer	
What is <i>Dystopian</i> fiction?	A story set in a fictional place or society where people are unhappy, afraid, and treated unfairly.	
What was Orwell (who wrote 1984) warning readers about?	The dangers of corrupt leaders and of technology.	
What is the function of a paragraph?	To section different ideas, themes and topics in your writing.	
What are the three types of sentence?	Simple, compound and complex.	
What are the four functions of sentences?	Declarative, interrogative, exclamatory and imperative.	

Topic Representing Data, Tables and Probability | Maths |

Week 1			Week 2		Week 3	
Question	Answer	Question	Answer	Question	Answer	
Question	Allswei	Question	Allowei	Question	Allswei	
What is a variable in the context of graphs?	One set of data that is represented on the graph	1) How can we tell if two thing strong correlation?	gs have a The data plotted will all closely follow the same direction	1) Can you define discrete d	Data that can only have a specific value within a range.	
2) What does it mean if something depreciates in value?	It goes down in value	2) What is the origin?	The centre of the graph (0,0)	2) Can you define continuous	data? Continuous data is information that can take any value, such as speed, so these values don't need to be whole numbers	
3) What is a positive correlation?	Two variables that move in the same direction.	3) How do we draw a line of best	t fit? We draw a line that passes in the general direction of most of the points, this does not have to pass through (0,0,)	3) Can you define quantitative	data? Numerical Data	
4) What is a negative correlation?	Two variables that move in opposite directions	4) What is an outlier?	A piece of data that does not fit the general trend.	4) Can you define qualitative d	ata? Non-numerical data	
.5) What would a graph look like if it the variables had no correlation?	There would be no general direction of the points on the graph.	.5) How do we use the line of bese estimate a value?	est fit to We draw the line of best fit and plot where the x/y co-ordinate will be on the	11		
			line of best fit to then find the correspoding co-ordinate.			
We	eek 4		Week 5		Week 6	
Question	Answer	Question	Answer	1	GOO I AT	
What must all probabilities add to make?	1	1) What is an expression?	An algebraic expression that is a collection of multiple terms.			
How would I select data systematically?	Select data at given increments within the data set.	2) What do we draw if we want to a bracket?	o expand A grid	Masters of re	ecall 2	
3) What is Sampling Bias?	Sampling bias occurs when the sample	3) What does it mean to expand	? To multiply out the brackets	Yuiz	71.77	

Multiplying

4) What operation are we performing if

we are expanding?

selected is not representative of the population, leading to biased results

And

The number on the bottomn of a fraction

4) What is a denominator?

.5) What does union mean?

Topic Brackets equations and inequalities, Sequences | Maths |

Week 1			Week 2		Week 3	
		Т				
Question	Answer		Question	Answer	Question	Answer
What is the difference between a term and an expression?	A term is one part of an expression e.g. 3t in 3t +7		What does it mean to solve an equation?	Work out the value of the variable	What does it mean to expand when we are working with brackets?	Multiply everything inside the bracket by what is in front of the bracket
When can't an expression be simplified?	When there are no common factors		Define positive	A number greater than zero	What is the link between multiplication and repeated addition?	They are the same 4 x 3 is 4 lots of 3 which is 4+4+4
Why are 4 – q and q – 4 not equivalent?	Because subtraction Is not commutative		Define negative	A number less than zero	Is it possible to have three or more terms inside a bracket?	Yes they could all be different variables
What does it mean if something has been squared?	It has been multiplied by itself		A positive number x by a negative number will make a?	Negative	What is the symbol for an identity?	=
How do correctly write a x b?	ab		A negative number x by a negative number will make a?	Positive	Which operation calculates the product of 2 values?	Multiplication

Question	Answer
Can 0 ever be a factor of an expression?	No because 0 x anything = 0
What does it mean to factorise fully?	Take out the highest common factor not just any factor
Is it always true if you can't have an expression then it can't be factorised?	No it could still be divided by another odd number
What are like terms?	Like terms contain the exact same variable/ variables e.g. 3p & 4p or 2qt & 9qt

Unlike terms contain different variables

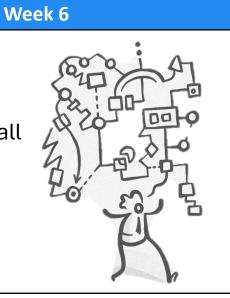

e.g. 5x and 6y

What are unlike terms?

Week 4

Question	Answer	
What's the name for a sequence where there is a constant difference?	Linear	
What would the graph of a linear sequence look like?	A straight, diagonal line	
What type of sequence adds the two previous terms together?	Fibonacci	
What is a non-linear sequence?	A sequence that does not go up by the same amount each time	
What is a coefficient?	A number in front of the variable. Eg 3 is the coefficient of 3n	

Week 5

Topic Respiration and photosynthesis, Movement and Pressure | Science |

We	eek 1	We	ek 2		We	ek 3
Question	Answer	Question	Answer	ŀ	Question	Answer
What is a risk factor?	A risk factor increases the chance that a person will develop a certain disease.	What is aerobic respiration?	Aerobic respiration is respiration that requires oxygen.		Write the word equation for anaerobic respiration in animals?	Glucose → Lactic Acid
What is a hazard?	Something thing or situation that presents a threat to people	Where does aerobic respiration take place in a cell?	Mitochondria		Describe the oxygen debt?	The volume of extra oxygen the body needs after exercise to react with the accumulated lactic acid to break it down.
.What is a risk?	How likely something is to be harmful.	What are reactants for aerobic respiration?	Oxygen + glucose	ш	How does the amount of energy transferred in aerobic respiration compare with anaerobic respiration?	More energy is transferred in aerobic respiration.
What is a precaution?	Something that should be done to prevent any harm.	What are the products for aerobic respiration?	Carbon dioxide + water (+energy)	-116	What happens during intense exercise?	During intense exercise, if there is not enough oxygen then anaerobic respiration
.What is respiration?	A chemical reaction that happens in all organisms. It is essential for life because it releases energy.	.What is anaerobic respiration?	Anaerobic respiration happens when the body doesn't have enough oxygen.		When does fatigue happen?	Fatigue happens when the energy stores in our muscles start to run out faster than the body can replace them.

Question	Answer
What is fermentation?	Fermentation is when yeast (or bacteria) carry out anaerobic respiration.
Write the word equation for anaerobic respiration in plants and yeast cells?	Glucose → ethanol + carbon dioxide
What is ethanol used to make?	Alcoholic drinks like beer and wine.

It is useful to bakers because it causes dough to rise and make a 'spongy' texture.

A chemical reaction that takes place in chloroplasts in plant cells. Carbon dioxide and water react to produce glucose and

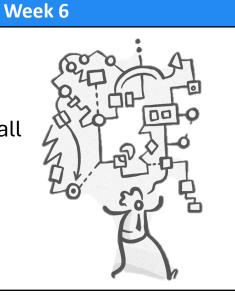

Why is carbon dioxide useful?

.What is photosynthesis?

Week 4

7	Question	Answer
1	Write the word equation for photosynthesis?	light Carbon dioxide + water> glucose + oxygen
1	Define the independent variable?	The thing that scientists change, to look at the effect of the changes.
	Define the dependent variable?	The thing that scientists measure, to look at what happened as a result of changing the independent variable.
	Define the control variable?	Variables that need to be kept the same, so that scientists know any effects on the dependent variable are caused by the independent variable.
	Define rate?	The amount of change per unit time.

Week 5

Topic Movement and Pressure, and Changing substances | Science |

Week 2

еек 1	
Answer	Question
How much distance is covered per unit time.	Write the word equation to pressure?
Speed = distance / time	What are the SI units for pr
m/s (metres per second)	What are the SI units for fo
M (metres)	What are the SI units for ar
s (seconds)	What is pressure?
	Answer How much distance is covered per unit time. Speed = distance / time m/s (metres per second) M (metres)

Question	Answer
Write the word equation to calculate pressure?	Pressure = force / area
What are the SI units for pressure?	N/m²
What are the SI units for force?	N (Newtons)
What are the SI units for area?	m² (metres)
What is pressure?	Force exerted per unit area.

Question	Answer
What is a moment?	A moment is the turning effect of a force.
Write the word equation to calculate a moment?	Moment = force x perpendicular distance
What are the SI units for moment?	Nm (Newton metre)
What are the SI units for force?	N (newtons)
What are the SI units for force?	m (metres)

Week 3

Question	Answer
What is a physical change?	A physical change only changes the state (solid, liquid or gas) of a substance. Physical changes only change the energy that each particle has. Therefore physical changes are reversible.

Week 4

What is a physical change?	A physical change only changes the state (solid, liquid or gas) of a substance. Physical changes only change the energy that each particle has. Therefore physical changes are reversible.
What is a chemical change?	Chemical changes rearrange the atoms to produce at least one new substance. Chemical changes are usually irreversible.
State the law of the conservation of mass?	The law of conservation of mass tells us that the total mass of products = total mass of reactants.
What is oxidation?	Oxidation is the gain of oxygen.

Question	Answer
What is reduction?	Reduction is the loss of oxygen.
What does the pH scale show?	The pH scale, from 0 to 14, is a measure of the acidity or alkalinity of a solution.
What is the name of the test for testing for Hydrogen gas? Describe how to test for Hydrogen gas?	Squeaky pop test. Place a lit splint into a test tube of gas and if Hydrogen gas is present it will make a squeaky pop sound.
Describe a test for carbon dioxide gas?	Use calcium hydroxide (limewater) and the limewater will turn cloudy when the carbon dioxide gas is bubbled through it.
Describe a test for oxygen gas?	Place a glowing splint into some gas and if oxygen is present it will relight.

Week 5

Topic 2 Banksy | Art |

		Topic 2 Ba	anksy Art		
W	eek 1	We	eek 2		Week 3
Question	Answer	Question	Answer	Question	Answer
What is political art?	Art is said to be political if it relates to some political situation or some political figures and challenges the current	What is Graffiti art?	Images or text painted usually onto buildings, typically using spray paint	What is the name of the graffiti artist that we are learning about?	Banksy
Name a famous political artist	situation Banksy, Pablo Picasso, Frida Kahlo, Jean	Why is graffiti art illegal?	It is considered to be vandalism and is often completed without permission	What is the subject matter of Banksy's work?	People, children, objects, policemen, rats, animals
Traine a raineae political article	Michel Basquiat, Diego Rivera, Barbara Kruger, Ai Weiwei, Shepard Fairey, Max			Name a fact about Banksy?	He is from Bristol His identity is unconfirmed
Why is political art important?	Artists use their work to express their	Why do people create Graffiti?	It is a way of communicating ideas and expressing themselves	• He starte years old	He started doing graffiti when he was 14 years old
Will be possible at the post and	political views and to promote social change. Governments use art to promote their agendas.				 He struggled with a spray can, so started cutting stencils Blek le Rat, a French stencil artist, is one of Banksy's earliest influences
					Girl with a balloon is one of his most recognizable artworks
W	eek 4	Week 5			week δ
Question	Answer	Question	Answer		om i A
What needs to be included in a research page?	Photos of the artists' work.Own small copy of the artists' work.Facts about the artist.	What is a stencil?	A thin sheet of card, metal, wood or plastic with an image or letters cut out of it. Paint, spray paint or ink is then applied through the holes onto a surface.		
	Opinions about the artists' work. Decorative background	Where were the first stencils found?	They were found in Paleolithic cave paintings, as early as 30.000 BC.	Masters of reca	
		How do you create a successful stencil?	By cutting carefully and by applying a small amount of paint at a time.	quiz	

Topic 2 Banksy | Art |

Advanced Spreadsheets | Computing |

Week 1		Week 2		Week 3	
Question	Answer			Question	Answer
What is a vector graphic?	A vector graphic is created directly from ge ometrical shapes. The shape of the	What tool do you use to write text?	A	What does a formula always start with in spreadsheets?	-
	object is stored as a set of points and connected with lines.	How do you put the text on the path of an object	From the main menu, select Text > Put on Path .	What does the SUM function do?	Add the contents of the cells selected
In Inkscape which is the tool you use to select an object or move it?		How do you flip the text	H or V depending on the way you want	What does the Average function do?	Finds Average of the cells selected
to select an object of move it :	*		to flip it		
How do you rotate a shape in Inkscape?	Select the shape and double click	How do you duplicate a shape	Ctrl D	What does the Max function do?	Finds the largest value of the cell
	your mouse	Thow do you duplicate a shape	Citib		selected
What tool do you use to draw lines?	2			.What does the Min function do?	Finds the smallest value of the cells selected
					•

Week 4				
Question	Answer			
What is a relative cell reference?	When you want the formula to change to match the row or column it applies too			
What is an absolute cell reference?	When you don't want the formula to change when filling cells			
What symbol is used to indicate that you want to use absolute cell referencing	\$			

Question	Answer	
What is conditional formatting?	When the format of the cell changes depending on the value in it	
What is the IF Function used for in spreadsheets?	When you want to make a choice and check if the statement is true or false	
What does the COUNT IF Function used for in spreadsheets	It counts the number of cells in a selected range that meet a specific criteria	

Week 5

Blood Brothers | Drama |

Week 2

Week 1				
Question	Answer			
What is a narrator?	A person who delivers a commentary accompanying a story.			
Where is Blood brothers set?	In Liverpool.			
When was it written?	1981.			
What is a prologue?	The introductory section of a dramatic work.			

Question	Answer	
Who are the blood brothers?	Mickey Johnstone and Eddie Lyons.	
How many children does Mrs Johnstone have?	7 children with 2 on the way!	
Who does Mrs Johnstone give one of her twins to?	Mrs Lyons.	
What is Mrs Johnstone's job?	She is a cleaner.	

Question	Answer
What is the Johnstone family's social class?	Working class.
What is the Lyon family's social class?	Middle class?
How old are Mickey and Eddie when we first meet them?	7 years old.
What is superstition?	The irrational belief in supernatural influences. Usually referring to good and bad luck.

Week 3

				4	
MM	-	-	KC.	4	
	•	U		_	

Question Answer Who is Linda? Mickey and Eddie's friend. They both fancy her. Who does Linda marry? Mickey. Who goes away to university at 18? Eddie. Who loses his job in the song, 'Just another sign of the times.' Mickey. Why does Mickey go to prison? He is blamed for Sammy shooting a man in a robbery.

Question	Answer	
How old are the boys by the end?	About 30.	
Why is Mickey angry?	Because Eddie kissed Linda.	
What is Eddie's job?	He is a councillor for the local government.	
What is Mickey addicted to?	Antidepressants.	
Which song plays at the end?	Tell me it's not true.	

Week 5

Topic 4 Blood Brothers' Theory | Drama |

Week 2

Week 1				
Question	Answer			
What is technical theatre?	Lighting and sound.			
What are two major themes of Blood brothers?	Class and superstition.			
Which characters are middle class?	The Lyons Family.			
What ages of Mickey and Eddie do we see through the play?	7, 14, 18 and later as adults.			

Question	Answer	
What is a thrust staging?	Where the audience are sat on three sides. Like in the drama classroom.	
What is another name for a proscenium arch staging?	End on.	
What famous sound effect is used in the final scene?	A gunshot.	
Who tell Mickey about Linda and Eddie kissing?	Mrs Lyons.	

Question	Answer
How would Eddie and Mickey's costume be different?	Eddie's would show he comes from a wealthy family whereas mickey's clothes would be worn and hand-me downs.
What accent does the Johnstone family speak with?	Scouse.
What accent do the Lyon's family speak with?	Received pronunciation.
Which scene demonstrates how the boys are treated differently based on their class?	The policeman scene.

1	717	<i>[</i> -] -]		41
				_

Question Answer What style of theatre is Blood brothers? A musical. Why is it known as the standing ovation play? Because of its powerful emotive ending. Would blood brothers be considered a comedy or a tragedy? A tragedy because the twins both die. What is social housing? Housing provided by the local council. Which symbol that starts off with a toy is featured heavily? Guns.

	Question	Answer	
What is f	oreshadowing?	An indication of something that will happen in the future.	
What is a	a lighting designers' job?	To design and create the lights for a show to tell the story.	
What is a	a stage managers job?	To oversee the running of the theatre through rehearsals and the shows.	
What do	es it mean for a show to tour?	To travel to lots of theatres around the country.	
Why is B	lood Brothers still relevant today?	Because class inequalities still exist.	

Week 5

Topic 3 Raging Russia | Geography |

Week 1		Week 2			Week 3		
Answer		Question	Answer		Question	Answer	
Europe and Asia		Which region in Russia has the coldest climate, with an average temperature of -15°C?	Eastern Siberia, in northeastern Russia, has the coldest climate, averaging -15°C.		How does the tundra biome limit development in Russia?	The tundra's harsh conditions and permafrost make building infrastructure difficult.	
14		Why is western Russia more developed than eastern Russia?	Western Russia is more developed due to trade routes, milder climate, and flatter, more		What industries in the taiga support Russia's development?	Logging is the main industry supporting development in the taiga.	
144 Million			Russia's five major biomes are		How do fertile soils in the steppe aid Russia's development?	Fertile steppe soils support agriculture, boosting Russia's economic growth.	
Moscow		biomes?	tundra, coniferous forest, steppe, deciduous forest, desert.		How many people live per square	Russia has about 9 people per square kilometre on average.	
11		What is the definition of climate?	Climate is the long-term weather patterns in a region over 30 years.		Kitometre in Nussia:	square kilometre on average.	
		What does precipitation mean?	Precipitation is water falling as snow, rain, sleet, or hail.		Is Russia's population increasing or decreasing?	Russia's population is decreasing due to low birth rates, migration.	
	Answer Europe and Asia 14 144 Million	Answer Europe and Asia 14 144 Million Moscow	Answer Europe and Asia Which region in Russia has the coldest climate, with an average temperature of -15°C? Why is western Russia more developed than eastern Russia? What are Russia's five major biomes? What is the definition of climate?	Answer Europe and Asia Which region in Russia has the coldest climate, with an average temperature of -15°C? Why is western Russia more developed than eastern Russia? What are Russia's five major biomes? What is the definition of climate? What does precipitation mean? Precipitation is water falling as	Answer Europe and Asia Which region in Russia has the coldest climate, with an average temperature of -15°C? Why is western Russia more developed than eastern Russia? What are Russia's five major biomes are tundra, coniferous forest, steppe, deciduous forest, desert. What is the definition of climate? What does precipitation mean? Precipitation is water falling as	Answer Europe and Asia Cuestion	

Week 4				
Question	Answer			
What development indicators are included in the Human Development Index (HDI)?	Life expectancy, literacy rate and income levels			
What percentage of people in Russia live in urban areas?	73%			
How did Russia's economy change after the collapse of the Soviet Union in 1991?	Shifted to market-oriented economy; example: privatised industries.			
What is the formula to calculate a country's Gross National Income per capita (GNI)?	Total income of a country dived by its population.			
What does privatisation mean?	Transfer of public assets to private ownership.			

brack t	Question	Answer	
What did Russia plant on the seabed beneath the North Pole in 2007?		Planted a titanium flag to claim the Arctic seabed.	
	Name one country in the Arctic Council besides Russia.	Canada, Denmark, Finland, Iceland, Norway, Sweden and United States	
╢	Why is Russia's Arctic coastline important?	Rich in resources and strategic shipping routes.	
	What area did Russia annex from Ukraine in 2014?	Crimea	
	Why did Russia go to war with Ukraine in 2022?	To keep Ukraine away from Western influence by control	

Week 5

Topic 3 What was the impact of the British Empire in India? | History |

Week 1			We	ek 2	Week 3		
		Т					
Question	Answer		Question	Answer	Question	Answer	
What is the meaning of the key word 'empire'?	A group of countries ruled by a single powerful country.		Who were the Mughals?	The Muslim rulers of India between 1600 and 1850.	In History, what is an interpretation?	An opinion or version of past events based on evidence.	
What is the meaning of the key word 'colony'?.	A country ruled by another country as part of an empire.		What was the East India Company?	British organisation that traded with India.	Why was Robert Clive seen as a great hero in Britain?	He helped Britain to gain control over Bengal.	
Name three British colonies.	Canada, India, Africa, West Indies, Australia and New Zealand.		How did the East India Company protect its trade?	It had its own private army.	Who did Robert Clive work for?	East India Company's private army.	
What is the key word for 'a more advanced and developed society'?	Civilised.		What year was the East India Company founded in England?	1599.	Who owned the East Indian Company?	British Merchants.	
In 1600, which country was more civilised, England or India?	India.		How did Robert Clive gain control of Bengal?	Persuaded an Indian General to overthrow their own ruler who was then			
				captured and executed.	What did the East Indian Company trade?	Indigo, Spices, Silk, Gems.	

Question	Answer
What is a mutiny?	Disobeying the people in charge and refusing to follow orders.
What was the short-term cause of the Indian Mutiny?	Cartridges in rifles that were used by the Sepoys were greased with cow/pig fat which went against their beliefs.
What was the name for the Indian soldiers in the East Indian Company army?	Sepoys.
What was the outcome of the Indian Mutiny?	The British defeated the Indians and punished them brutally.

Week 4

Question	Answer	
Who ruled India between the years 1858 and 1947?	The British Raj (Government).	
Name an advantage of the British Empire ruling India.	The British built irrigation systems and railway networks improving trade, water and food supplies in India.	
What is a massacre?	The unnecessary killing of a large number of people.	
What year did India gain independence from the British Empire?	1947.	

Week 5

Topic 4 How Far Away was England from a Revolution? | History |

Week 2

We		
Question	Answer	Question
What is the meaning of the key word, 'Revolution'?	A complete and total change of the people in power.	What is the meaning of 'democra
Who was the last king of France?	Louis XVI.	Why were people unhappy with t voting system in Britain in the 18
Why did the French Revolution frighten the British Government?	They were worried the people of Britain were going to do the same as the French and revolt.	Who were the Luddites?

			•		· · · · · · · · · · · · · · · · · · ·
	Week 1	Week 2		Week 3	
Question	Answer	Question	Answer	Question	Answer
Name 3 safety rules for the Textiles	 Tie hair back Only 1 person on a sewing machine at once Do not lean over others while working 	Why is it important to plan out a design before you begin construction?	To ensure that you have worked out if the design will actually work/ fit/ is accurate before using expensive materials that could then be wasted. To ensure you do not waste time and effort on a design that is unfit for purpose.	What are the 5 stages in the design process?	 Imagine Plan Design Improve Feedback
		What is a specification?	A list of things that a design must have/include.	What are the names of the 3 hand stitching techniques you have learnt?	Back stitch Running Stitch Cross Stitch
Name 3 safety rules in the Design Technology Room	Do not run Wear an apron	What does the yellow line on the floor in the workshop tell us?	This is the area where 1 person can stand while the machine is in operation.	What is CAD?	Computer Aided Design
 Wear PPE Be aware of you 1 person on a notime. 	Be aware of your surroundings1 person on a machine at any one	What are the following safety symbols for?	Ear Protection Protective Gloves Face Protection Eye Protection Dust Mask/ Protection	What is CAM?	Computer Aided Manufacture
Week 4		Week 5		Week 6	
Question	Answer	Question	Answer		
What is the difference between the back stitch and the running stitch? The running stitch is often a weaker stitch. It has gaps between the stitches. A back stitch is where the thread connects together to form a single running line. This leaves a stronger stitch as there are twice as many stitches in the		What is meant by applique?	Stitching one piece of material to another. Applique is a needlework technique in which one or more pieces of fabric are attached to a larger background fabric to create pictures or patterns.		8200
sar sizo	same amount of space In both stitches the size and length of each stitch should be consistent to achieve a high standard.	Name the following symbol / button from 2D design	Select This is the select tool. It allows you to click on drawn objects. Once you have clicked on them, they will become highlighted and have yellow boxes around them	Masters of recall quiz	
Why is it important to conduct existing product research?	So that we are aware of what is already available. this can inform design but will also prevent copy right / plagiarism.	Name the following symbol / button from 2D design	Line Tool This tool adds lines to your page. You can adjust the length and width of the line.	quiz	20 20
Why do we complete a mood board?	This is a quick way of gathering vast amounts of information / ideas which we can then use to help us understand the product, target market or design limitations before	Name the following symbol / button from 2D design	Grid This button controls the grid on the page. At the moment the dots are set to be 10mm (1cm) apart.		THE BOTTON

starting our own design.

Topic 2 Nature Phone Case / Art Deco Clock | Technology (Textiles / Design)

Week 1		Week 2		Week 3	
Question	Answer	Question	Answer	Question	Answer
What is meant by embellishment?	a decorative detail or feature added to something to make it more attractive	How do you control the speed on your sewing machine?	With the foot pedal	Why is important to create a pattern for your product.	This will allow you to make a stencil for all the pieces out of paper before cutting out of fabric. Any mistakes can be rectified without
What 5 things must your initial design include?	Design showing the front and back. Fastening Choice	What part of the machine holds your fabric and helps to pull the fabric forward as you sew?	The foot	What is a name for your paper model	wasting expensive material. A working prototype.
	Colour Materials Annotations showing the different shapes and material choice.	How many piece of thread should be showing before starting to sew.	Two	Your clock should be 3D. How will	The design should have several layers of Art Deco shapes that will be fastened together to
What does Contour mean in 2D design?	Contouring is when you create a stencil out of your image, leaving only the cut lines.	What shapes do we usually find within Art Deco?	Triangles, Circles, Wings, Squares	you ensure your design is 3D if we are using the lazer cutter?	create a 3D structure.
What does Vectorise mean in 2D design	Vectorising an image makes the image simple and black and white. This removes any blurry parts of the image that the cutter can't use.	What colours do we usually find within Art Deco?	Gold, Yellows, Silvers, Black, Red		
Week 4		Week 5		,	Week 6

Question	Answer
How do we fasten the felt together before sewing?	Glue them in place
What would we use if we were not using felt but maybe cotton?	Pins
How big must the Contour path size be for each of your shapes in 2D design?	Maximum of 1mm. Ideally 0.5mm
What do need to ensure we do to the colour when we are vectorising any images off the internet?	Make them Monochrome and scale down the number of colours.
What will this scaling down, do to the image quality?	It will make it less accurate and detailed.

l	Question	Answer
	Why is it important to leave a boarder around your pattern pieces when you cut them out.	This leaves a hem which will hold the stitch. if you stitch it without a hem, it will be smaller than you intended.
	How big is this boarder?	1 cm.
	Do you sew the hem on the inside or outside?	Inside, so it will be sewn inside out.
	What do we need to make sure we do to the colour of the lines before sending it to be cut?	Black lines for Cutting and red lines for engraving.
	What do we need to ensure we do with each line / shape before we send them to be cut?	All lines need to be touching with no gaps. Shapes need to be checked to ensure they are the correct size.
